

PRIYANSHU CHAUDHARY

priyanshuc2425@gmail.com | +91 7004 163 132 | github.com/priyanshuchaudhary2425 | Silvassa, India

Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Authentication & Authorization

Database: PostgreSQL, SQL, Database Schema Design

Tools & Deployment: Git, GitHub, Docker, Postman, Vercel, Render

Languages: JavaScript, Python, C++

Education

Savitribai Phule Pune University - B.Sc. in Computer Science - 2023 - 2026

Lions English School - Class XII (Science) - June 2022

Lions English School - Class X - June 2020

Projects

PayFlow - React | Node.js | Express.js | PostgreSQL | Razorpay

- Built a creator platform allowing users to sell digital products, collect payments, manage event registrations, and track revenue analytics.
- Implemented backend services with JWT authentication, RBAC authorization, payment verification workflows, and secure REST API architecture.
- Structured normalized PostgreSQL database schemas supporting transaction management and optimized complex queries for reporting operations.

CraftCV - React | Node.js | Express.js | Gemini API | Vercel

- Developed a full-stack AI document generation platform allowing users to create tailored resumes and cover letters using LLM-driven text generation.
- Implemented backend workflows for prompt engineering, API orchestration, request validation, and low-latency content generation through Gemini API integration.
- Deployed production-ready application on Vercel, supporting 200+ users with optimized request handling and seamless user experience.

FeeTracker - React | Node.js | Express.js | PostgreSQL | Google OAuth 2.0

- Developed a fee management system streamlining student onboarding, fee collection, batch management, and real-time revenue tracking for educational institutions.
- Engineered secure backend workflows using Google OAuth, role-based access control, and optimized PostgreSQL schemas for scalable transaction and reporting operations.

Work Experience

Freelance Web Developer - 2025 - Present

- Engineered complete full-stack systems independently, owning frontend architecture, backend services, database design, and deployment workflows from requirements to production.
- Collaborated directly with clients to gather requirements, iterate on feedback, and deliver solutions within agreed timelines.
